DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Response to Amendment

2. Newly submitted claim 15 and amended claim 10 into an independent claim directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

- I. Claims 1-9 and 12-14, drawn to a plasma display panel, classified in class 313, subclass 584.
- II. Claims 10-11 and 15, drawn to a method for manufacturing a plasma display panel, classified in class 445, subclass 25.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the plasma display panel could be made by screening printing and sand blast method.

Since these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification; and the

Art Unit: 2875

applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 10-11 and 15 withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Allowable Subject Matter

3. Claims 1-9 and 12-14 are allowed.
4. The following is an examiner's statement of reasons for allowance:

Claim 1 and 14, a plasma display panel comprises a mesh-patterned partition sidewall and plurality gas-filled cells therein. In which, portions of the respective surrounding sidewall form mesh-like air paths through all the plurality gas-filled cells.

The limitations discussed above are neither disclosed nor suggested by the prior art of record.

Claims 2-9 and 12-13 are dependent on claim 1.

Monfroy et al. [US 3,953,756] and Lee et al. [5,990,616] disclose a gas display panel having one direction air path, but they do not teach or suggest mesh-like air paths through all the plurality gas-filled cells.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. This application is in condition for allowance except for the following formal matters:

Claims 10-11 and 15 withdraw from consideration.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
